

## Operating Instructions for Control Boxes in the LC-Series

### Installation (only for authorized personnel)

- Plug in the drives into the 8-pin molex sockets.
- Connect the handset with the RJ-45 socket in the control box.
- Plug in the main power supply. Please make sure that the operating voltage of the system conforms with the local power supply.

### Starting up

**Always reset the lifting system to zero before using for the first time:** Press the down-button 4 times and then the control box will play a sound. If the actuators are not down at the bottom, the actuators will move down.

**Note:** Before starting up, make sure that all drives/lifters are plugged in completely and correct and that there cannot be a collision while moving down.

**Operating:** Use the “Up” or “Down”-buttons to move the drives.
