

Lifting columns, control panels and control boxes for the pharmaceutical industry/pharmaceutical production, hospital, healthcare sector and laboratories

The lifting columns have smooth, easy-to-clean and hygienic anodised aluminium surfaces

Medical lifting columns for:

- Medical equipment and instruments
- Radiographic equipment and accessories for MRI scanners, X-ray/CT and ultrasound
- Operating theatre inventory and equipment
- Laboratory equipment and inventory
- Machinery for pharmaceutical factories, production and processing plants
- Packing plants in pharmaceutical factories
- Equipment for occupational therapy/rehabilitation
- Monitor walls and hygiene equipment
- Subcontractors who produce machinery, equipment, instruments and supplies for the pharmaceutical industry
- The food industry
- Certificates/authorisations: Suitable for industries where a clean environment & high level of hygiene is required

Medical lifting columns, control panels and control boxes

- for building medical and laboratory equipment, diagnostic equipment/imaging, instruments, machinery, production and packaging facilities, monitor walls and equipment, etc. The medical lifting columns are available in both rapid and high lifting force versions. Multiple medical lifting columns can be linked together in synchronised operation. Medical lifting columns and their related technology are designed to implement and build ergonomically correct workplaces to be used in both a sitting and standing position. Remote control is also available, either via small smart remote control or via an iPhone® or Android® SmartPhone.

Low-Noise

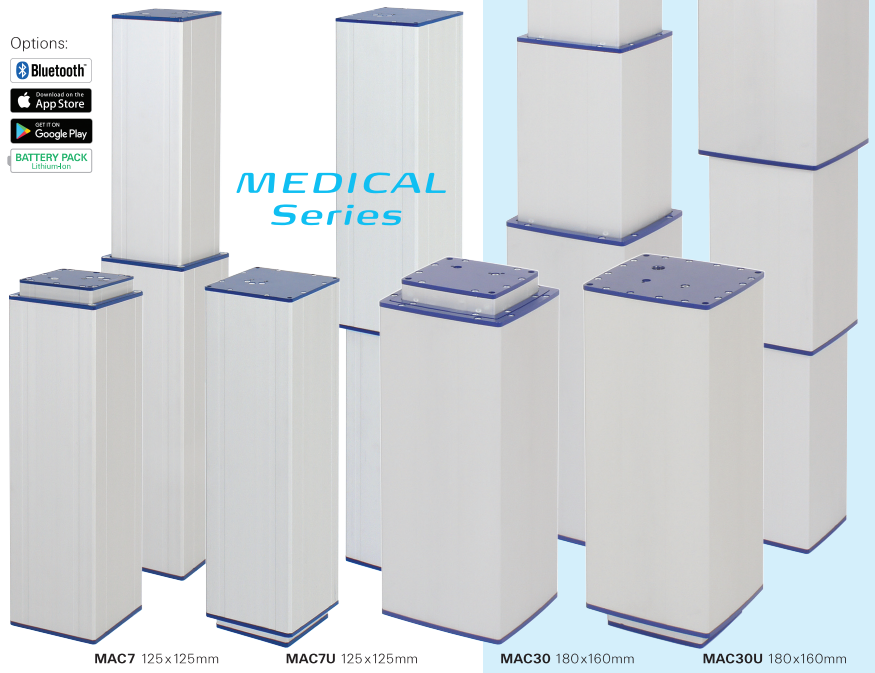

Shown below are Movetec's silent medical lifting columns **MAC7/7U** and **MAC30/30U** (U-versions are with cable outlet in the outer profile). Medical lifting columns are strong: up to **6000N/600kg** per lifting column!

Options:

MEDICAL Series

MAC7 125x125mm

MAC7U 125x125mm

MAC30 180x160mm

MAC30U 180x160mm
